# ABOUT UNIDOGE?

**SWAP, EARN, AND BUILD ON THE LEADING  
DECENTRALIZED CRYPTO TRADING PROTOCOL**

UNIDOGE is a noncustodial automated market maker implemented for DOGECHAIN.  
In comparison to earlier versions of the protocol UNIDOGE provides increased capital efficiency and fine-tuned control to liquidity providers, improves the accuracy and convenience of the price oracle, and has a more flexible fee structure.

Automated market makers (AMMs) are agents that pool liquidity and make it available to traders according to an algorithm. Constant function market makers (CFMMs), a broad class of AMMs of which UNIDOGE is a member, have seen widespread use in the context of decentralized finance, where they are typically implemented as smart contracts that trade tokens on a permissionless blockchain

# THANK YOU

UNIDOGE

UNIDOGE project was born from the desire to make the DEFI more accessible and the vision to create a platform by users for users. We hope to create something which will disrupt the blockchain industry as we currently know it and are proud to be at the forefront of pushing the boundaries of what is possible. This we know, we cannot achieve without the support of YOU, our community. We implore you to join us on this exciting journey with UNIDOGE!
